

ARPIT SRIVASTAVA

Software Engineer | Full-Stack Developer | AI/ML

Location: Noida, India | Email: geniusbillionairearpit@gmail.com | Phone: +91 8920617516

Portfolio: <https://arpit-srivastava-real-portfolio.vercel.app/> | LinkedIn: [linkedin.com/in/arpit-srivastava-wd](https://www.linkedin.com/in/arpit-srivastava-wd) | GitHub: github.com/ArpitVentures

SUMMARY

Computer Science Engineering student specializing in AI/ML, with hands-on experience building backend and full-stack applications using Java, JavaScript, React.js, Node.js, Express.js, and MongoDB. Experienced in developing REST APIs, authentication workflows, database-driven applications, and AI-powered computer vision systems. Interested in backend engineering, scalable software systems, and applied AI.

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, SQL

Frontend: React.js, Next.js, TypeScript

Backend: Node.js, Express.js, REST APIs, JWT, Authentication

Databases: MongoDB, MySQL, SQLite

AI / ML: OpenCV, MediaPipe, PyTorch, Scikit-learn

Tools: Git, GitHub, Postman, Docker

Core CS: Data Structures & Algorithms, OOP, DBMS, OS, Computer Networks

EXPERIENCE

Software Developer Intern — W3Villa Technologies Private Limited

Jun 2026 – Jul 2026

- Contributed to the development of ORBIQ, a full-stack productivity SaaS platform, building and enhancing frontend and backend features using React.js, Node.js, Express.js, and MongoDB.
- Developed and integrated REST APIs while working with backend logic, database operations, and authentication workflows.
- Worked with CVAT (Computer Vision Annotation Tool) for image annotation and dataset preparation to support AI/ML workflows, and debugged application issues in an Agile environment using Git and GitHub.

PROJECTS

ORBIQ — Full-Stack Productivity Workspace | React.js, Node.js, Express.js, MongoDB, JWT, Razorpay

- Developed a full-stack productivity workspace featuring secure authentication, task management, membership plans, and Razorpay-based payment integration.
- Built REST APIs with JWT-based authentication and role-based access control on a scalable MERN architecture with a responsive UI and modular backend.

GitHub: github.com/ArpitVentures/orbiq-by-arpit | Live Demo: orbiq-by-arpit.vercel.app

FocusGuard Vision — AI-Powered Focus Monitoring System | Python, OpenCV, MediaPipe, PyQt6, SQLite

- Developed an AI-powered desktop application for real-time focus monitoring using Computer Vision and Explainable AI (XAI), with face detection, eye tracking, head pose estimation, blink analysis, and drowsiness detection.
- Designed a modular desktop application with PyQt6 and SQLite, providing live telemetry, attention analytics, and real-time alert generation.

GitHub: github.com/ArpitVentures/focus-guard-vision

Machine Learning-Based Financial Risk Assessment and Fraud Detection Framework | Python, Machine Learning, Scikit-Learn, Data Analysis

- Developing a machine learning framework for financial risk assessment and fraud detection using structured financial data and predictive modeling techniques.
- Working on data preprocessing, feature analysis, model development, and evaluation to identify potential financial risk and fraudulent patterns.
- Planning a modular prediction layer for future integration with backend services and application interfaces.

Status: In Progress

Student Management System | Java, Data Structures, OOP, File Handling

- Developed a Java-based Student Management System with CRUD operations, search functionality, and file-based persistent storage using ArrayList and OOP, with a modular architecture simulating real-world workflows.

GitHub: github.com/ArpitVentures/Student_Management_System

EDUCATION

B.TECH, Computer Science Engineering (AI/ML) — IILM University

2024 – 2028

CERTIFICATIONS

AWS | Cisco | Networking Basics | Introduction to Data Science
